How to enable SkyCommand on european TM-D710E – 25.10.2007 LA3QMA

Open top cover.
Remove all cables
Remove all screws
Unsolder the antenna wire on the connector side **not on the print.**
(Marked as #1 on the last picture)

Remove 4 screws under the print marked with blue

Remove the print.

Remove the screws from the last print.

Unsolder the 0k resistor marked "4".

Reverse the prosess and power up.

Voila you have SkyCommand on the TM-D710E
Change the default seting of PF1 and PF2 as they now are default to WX-memory channels.
