

TURNER Microphones

Famous + '2' MICROPHONE

Features a two transistor pre-amp with volume control to give you up to 50 times the output level you now have. Perfect sets that lose some power as the years go by. Turner's "+2" puts zip back in your set and keeps it to full strength. Clearest voice transmissions with knocked down local noise interference by simply dialing the volume you desire. The "+2" works with all sets regardless of switching requirements and comes complete with wiring diagrams to wire directly into 100 transceivers. Easy to install. Hammertone blue finish with matching coil cord.

+ '3' MICROPHONE

The Turner Plus Three as the professional base station microphone has 300-3,000 Hz frequency response with Turner's exclusive new ceramic interior design. The "+3" has a new transistorized pre-amp with volume control plus a new compression amplifier circuit which allows you to talk close or far from the mike without varying the output signal. The prevents mike splatter. Three conductor (1 shielded) coiled cord, touch to talk front touch bar switching with slide-lock when desired for extended transmitting. Comes complete with wiring instructions for more than 100 popular transceivers. The finest base microphone you can buy.

NEW TURNER SUPER SIDE KICK

\$4995

An amplifier gain control on the bottom of the new TURNER SUPER SIDEKICK as well as an audio output control knob on the top of the microphone base gives you the capacity to FULLY modulate ANY transmitter. Its IC amplifier provides a perfect impedance match for all transistorized and SSB transceivers. Output level is adjustable to a maximum of 25 db. Plenty of output to drive even hi impedance, tube type sets! It can be used for either relay or electronic switching. Modern jet black die cast base and polished chrome head. Lock-on talkbar. Get the mike that gives you maximum versatility, the SUPER Sidekick. Batteries included. Uses 9-volt transistor batteries.

Mike makes the difference.

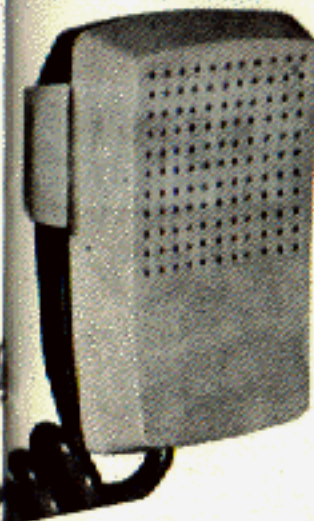

M+3

Mobile
Transistorized
Pre-Amp with
Modu-Gard

\$3666

The benefits of the +3 base station microphone now in a mobile version... New modern styling, blue case with coiled rubber blue cord... 300-3,500 Hz frequency range... 7-volt battery easily replaceable through rear door. New slide-action volume control. Transistorized pre-amp plus Modu-Gard, prevents over-modulation, guarantees a clear strong signal always.

800-033... SH. WT. 2 LBS.....\$36.66
Same as above but wired for electronic switching.
800-034... SH. WT. 2 LBS.....\$36.66
Same as above for use with Johnson Base and Mobil rigs.
800-011... SH. WT. 2 LBS.....\$36.66
