

dbx Model 902: I_r ut & Filter Section

Notes: ① R7A & R7B are 20K reverse log-taper pots ganged together on the same shaft.

② The "High-Pass Filter" is a difference amp that subtracts the Low-Pass signal from the flat signal, giving the equivalent of a high-pass output.

③ All op-amps LF353 (dbx #146241).

④ ○ indicates an edge connector pin.
