SPECIALIST ACCESSORIES

RR SPORT

Off-Road Pursuits

For the enthusiasts amongst you, in our specialist section you will find our complete range of Terrafirma products, complemented by Front Runner expedition equipment, Hi-Lift jacking equipment and winches from both Warn and Superwinch. All our Terrafirma products have been designed and specified by off-road and overland experts and are guaranteed fit for purpose. As the range continues to grow, Terrafirma's philosophy is applied to every product - quality, performance and value.

On the road style

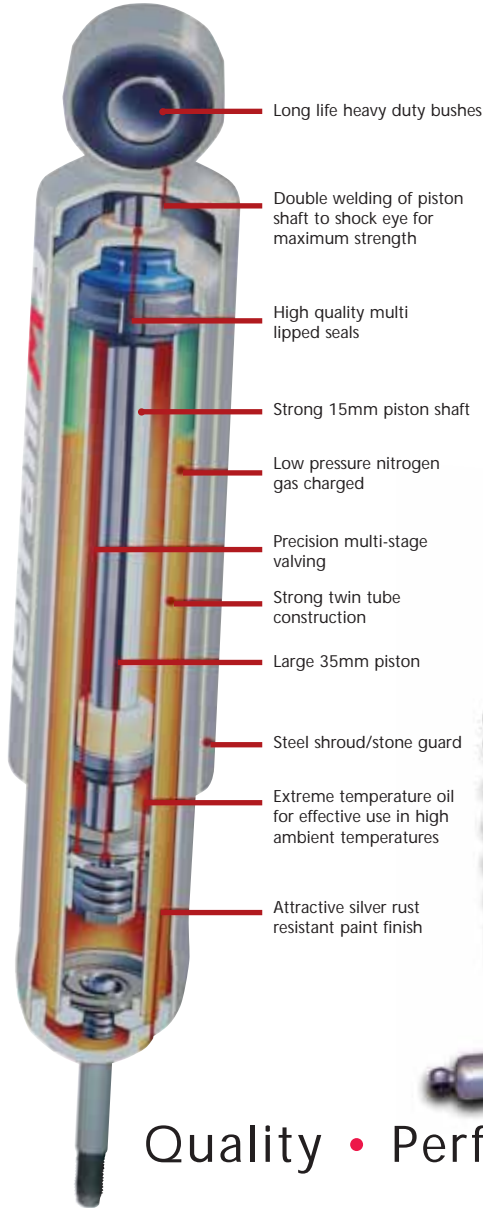

For those who like to stand out from the rest, take a look at our Kahn range for a taste of luxury and individualism, specifically for Freelander 2, Discovery 3, Range Rover L322 and Sport.

TerrafirMa

serious suspension

TerrafirMa suspension achieves the perfect combination of ride, handling and control under various loads with carefully engineered and matched shocks & suspension systems. 2" of lift can be maintained with properly selected coil springs improving both on and off road performance.

TerrafirMa suspension is absolutely ideal for recreational, commercial and expedition vehicles alike. Our shocks, springs and steering dampers are all significantly upgraded from original fitment and are intended to increase the vehicle's ride height, load carrying ability and handling.

Long life heavy duty bushes

Double welding of piston shaft to shock eye for maximum strength

High quality multi lippered seals

Strong 15mm piston shaft

Low pressure nitrogen gas charged

Precision multi-stage valving

Strong twin tube construction

Large 35mm piston

Steel shroud/stone guard

Extreme temperature oil for effective use in high ambient temperatures

Attractive silver rust resistant paint finish

Quality • Performance • Value

TerrafirMa Remote Reservoir Shock Absorbers

Fantastic new high performance Remote Reservoir Shock Absorbers are now available to fit Land Rover Defender, Discovery 1 and Range Rover Classic. Suitable for all applications from fast road to hard core off road.

- Rugged Twin Tube design
- Remote Reservoir for increased performance
- 40mm shock piston
- 57mm large capacity shock body

- Massive 20mm shaft diameter
- Adjustable Nitrogen pressure
- Gas oil separator reduces fade
- Std mounts for easy installation
- Factory set gas pressure for immediate fitment
- Fitting kit and instructions

The new TerrafirMa Remote Reservoir Shocks have increased oil and nitrogen capacity separated by a floating piston within the remote canister. This prevents the gas mixing with the oil at high temperatures, reduces aeration and significantly improves the performance of the shock absorber, reducing fade and loss of performance.

With approximately 75% greater oil capacity than a conventional shock absorber, considerably lower operating temperatures are achieved resulting in the exceptional ride quality and endurance of the TerrafirMa Remote Reservoir Shocks.

TerrafirMa Remote Reservoir Shocks can be adjusted by your local TerrafirMa stockist to suit different applications. For example if your vehicle is used for expeditions and is occasionally heavily laden the gas pressure can be increased to provide improved handling and control. The Nitrogen pressure can be set between 60 and 200psi to suit customer's personal preferences. Higher pressure will result in increased damping giving a firmer more controlled ride.

TerrafirMa

serious suspension

TerrafirMa Shock Absorbers, Steering Dampers and Suspension Accessories

Shock Absorber for 90/110/D1/RRC

A tough twin tube design allows for a large volume of oil for cooler internals and improved protection of working parts. Low-pressure nitrogen eliminates cavitation and provides optimum oil viscosity for greater resistance to fade. Special internal bump stops preserve the internal piston from impacts in extreme condition. High quality finish deep silver powder coated finish resists corrosion for long lasting good looks.

Front - TF116
Rear - TF117

Shock Absorber for Discovery 2

Featuring a tough twin tube design allowing a large volume of oil for cooler internals and improved protection of working parts. Special internal bump stops preserve the internal piston from impacts in extreme conditions. Low-pressure nitrogen eliminates cavitation and provides optimum oil viscosity for greater resistance to fade. High quality deep silver powder coated finish resists corrosion for long lasting good looks.

Front - TF118
Rear - TF119

Shock Absorber for 90/110/D1/RRC

Rugged Twin Tube design, 40mm shock piston. Massive 20mm shaft diameter. Gas oil separator reduces fade. Remote Reservoir for increased performance. 57mm large capacity shock body. Adjustable Nitrogen pressure. Std mounts for easy installation. Factory set gas pressure for immediate fitment.

Front - TF401
Rear - TF402

TF811 Steering damper D1/RRC

A tough twin tube design allows for a large volume of oil for cooler internals and improved protection of working parts. Low-pressure nitrogen foam cell for increased performance. 50/50 valving for equal damping lock to lock. 36mm piston, 54mm outer tube and 16mm shaft diameter. High quality deep silver powder coated finish resists corrosion for long lasting good looks.

Spring Spacers

These spacers simply provide an additional 2" of lift using your existing springs making your vehicle look great. Also useful when using really big tyres.

90/110/D1/RRC Front - TF516
90/110/D1/RRC Rear - TF517

Front Dislocation Cones

Allow the front springs to dislocate and relocate on full suspension drop out when using long travel shocks or lowered front shock turrets.

90/110/D1/RRC - TF501

Rear Dislocation Cones

Allow the rear springs to dislocate and relocate on full suspension drop out with long travel shocks or lowered top shock mounts.

90/D1/RRC - TF510
110 - TF511

Bump Stop Spacers

Increase the size of the original bump stops to help prevent larger tyres from touching the bodywork, also used in combination with lowered shock mounts preventing the shocks from bottoming out on full suspension compression.

90/110/D1/RRC - TF515

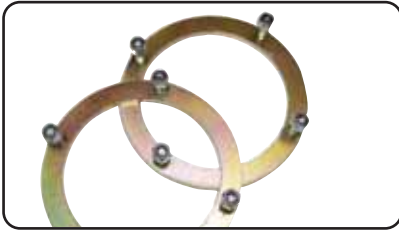

Lowered Rear Top Shock Mounts

Allow more suspension drop out movement with std travel shock absorbers keeping the tyre in contact with the ground. Ideally used with dislocation cones and bump stop spacers.
90/110/D1/RRC - TF512

Spring Retaining Plates

Keep the springs attached to the axles during full suspension drop out. Ideally used with lowered top shock mounts and dislocation cones.
90/110/D1/RRC - Front - TF505
90/D1/RRC - Rear - TF506
110 - Rear - TF507

Shock Turret Securing Rings

Heavy-duty front shock turret securing rings for heavy off road use. Ideally used with skeleton front shock turrets and twin shock turret kits.
90/110/D1/RRC - TF502

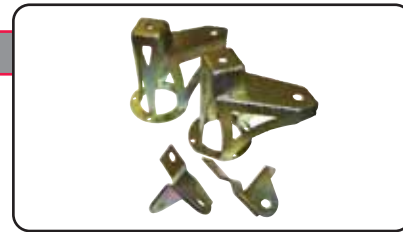

Front Skeleton Shock Turrets

Heavy-duty skeleton shock turrets. Available both in standard height or lowered versions that allow greater axle articulation while off road. Ideally used with securing rings and dislocation cones.
90/110/D1/RRC Standard height - TF504
90/110/D1/RRC Lowered height - TF503

Front Twin Shock Turret Kit

Heavy-duty skeleton front twin shock turrets allow fitment of twin shock absorbers for heavy duty or fast off road. Must be used with heavy duty securing rings.
90/110/D1/RRC - TF514

Rear Twin Shock Mount Kit

Heavy-duty mounting kit to fit twin shock absorbers to the rear of heavily laden or fast off road vehicles. Helps to reduce body roll and shock failure.
90/110/D1/RRC - TF513

Caster Corrected Front Radius Arms

Lighter than standard, these front radius arms have the caster angle corrected by 3 degrees for vehicles lifted 2" or more.
90/110/D1/RRC 44mm only - TF508

Cranked Rear Radius Arms

These heavy-duty rear radius arms are cranked to reduce the strain on the chassis bush on lifted vehicles.
90/110/D1/RRC - TF509

Caster Correction Bushes

Correct the steering geometry to ensure good road handling on lifted vehicles.
90/110/D1/RRC 44mm only - PB51-502K

TerrafirMa

serious suspension

TerrafirMa Coil Springs

TerrafirMa coil springs are designed to provide approximately 2" of lift under a variety of different loads. Improvements are achieved in load carrying, ground clearance, load carrying and towing both on and off road. All springs are made from the highest quality steel and have been shot peened and scragged to ensure long spring life. Springs are then powder coated TerrafirMa silver for long lasting good looks.

TerrafirMa 2" Lift Kits available for:

Defender 90
 Light Load TF201
 Medium Load TF202
 Heavy Load TF204

Defender 110/130
 Light Load N/A
 Medium Load TF203
 Heavy Load TF205

Discovery 1
 Light Load TF201
 Medium Load TF202
 Heavy Load TF204

Range Rover Classic
 Light Load TF201
 Medium Load TF202
 Heavy Load TF204

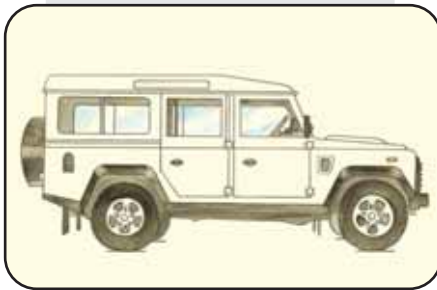

Basic kits include:
 4 x TerrafirMa Springs and
 4 x TerrafirMa Shock Absorbers

Light Load: Vehicles with no additional equipment fitted.

Medium Load: Vehicles fitted with some additional weight such as under-body guards.

Heavy Load: Vehicles fitted with significant off road equipment such as winches and expedition equipment.

Typical vehicle showing Light Load

Typical vehicle showing Medium Load

Typical vehicle showing Heavy Load

TerrafirMa Suspension quick application guide

Please note: all lifts shown in this guide are approximate. The actual lift will vary depending on the load carried and your individual vehicle set up. Increasing the load will reduce the lift, using a heavier spring with less load will increase the lift but may effect wheel travel.

Defender 90

TerrafirMa

serious brakes

TerrafirMa brakes offer increased bite from cold and excellent fade resistance in most 4WD braking situations. Whether it's a steep rocky descent, ploughing through mud and water or just daily driving, the brakes will give excellent performance.

Using **TerrafirMa** cross-drilled and grooved brake discs stopping in all conditions will be further improved. Grooves are machined into the brake disc to force away the dust and gasses that build up between the pad and disc, keeping the brakes cooler and reducing fade. The cross drillings contribute to cooling and heat dissipation and also allow the gasses to escape.

TerrafirMa Brakes - Quick application guide

TerrafirMa cross drilled and grooved brake discs achieve their full potential when combined with high quality brake pads such as Lucas TRW.

Defender and Discovery equipped with solid front brake discs, can easily be upgraded to vented discs by fitting brake callipers STC1266/67.

Polybush Kits

The most comprehensive range of polyurethane suspension bushes for Land Rover vehicles. With 3 grades available it is possible to select the perfect bushes for any application and working environment. Increased durability, tear and shear resistance, together with the usual polyurethane benefits of long life and resistance to oils and fluids.

Classic or Performance.

The red bushes are produced from a stiff material providing a firm, taut precise ride. Ideal for sports or heavy-duty commercial applications.

Comfort.

The blue bushes closely resemble the comfort of the original rubber bushes with increased resilience and performance in extreme conditions.

Dynamic.

The new orange bushes are designed to meet the requirements of modern 4x4 vehicles comfort and flexibility combined with firm precise handling. Most of the competition range of bushes have also been produced using this unique material.

Front Runner Accessories

Front Runner have developed the most versatile and advanced range of 4x4 accessories, utilising the very latest technology and materials. All makes are pleased to offer the following range of Front Runner specialised products for Land Rover vehicles.

Expedition Roof Rack - FRDISCOEX

Black powder coated aluminium expedition roof rack. 2.2m long x 1.4m wide. The Expedition rack has a 1.4m open end and can be fitted with the open end to the front or rear. All racks will accept Front Runner accessories without drilling by means of the unique slotted extrusions used in the rack construction. (Ladder not included)
Suitable for Discovery 1 and 2.

Expedition Roof Rack - FRLREX90

Black powder coated aluminium expedition roof rack. 2.0m long x 1.4m wide. The Expedition rack has a 1.4m open end and can be fitted with the open end to the front or rear. All racks will accept Front Runner accessories without drilling by means of the unique slotted extrusions used in the rack construction. (Ladder not included)
Suitable for Defender 90.

Expedition Roof Rack - FRLREX110

Black powder coated aluminium expedition roof rack. 2.8m long x 1.4m wide. The Expedition rack has a 1.4m open end and can be fitted with the open end to the front or rear. All racks will accept Front Runner accessories without drilling by means of the unique slotted extrusions used in the rack construction. (Ladder not included)
Suitable for Defender 110.

Slimline Roof Rack - FRDISCO4002

Black powder coated aluminium expedition roof rack. 2.2m long x 1.3m wide. The Slimline rack is a flat rack and will accept Front Runner accessories without drilling by means of the unique slotted extrusions used in the rack construction. (Ladder not included)
Suitable for Discovery 3.

Roof Rack Access Ladder - FRLR23

Aluminium 2 piece ladder, attaches to the rear body for easy access to any roof rack. Does not obstruct number plate. Supplied with fitting kit and instructions.
Suitable for Defender.

Roof Rack Access Ladder - FRDISCO21

Black powder coated steel ladder attaches to the rear door for easy access to any roof rack. Supplied with fitting kit and instructions.
Suitable for Discovery 1 and 2.

Roof Rack Access Ladder - FRDISCO22

Black powder steel coated ladder attaches to the rear door for easy access to any roof rack. Supplied with fitting kit and instructions.
Suitable for Discovery 3.

Extended Range Fuel Tank

Additional fuel tanks to extend the range of your Land Rover Defender 110. All tanks are 45litre capacity and are fitted between the filler neck and existing fuel tank. Tanks are supplied with fitting kits and instructions.
(Not suitable for HCPU)

1983-1998 - FRLR41
1998-2007 Td5 - FRLR44
2007 Td4 - FRLR49

Tie Down Ring - FRUN11

These zinc plated tie down rings can be located in the slots in the roof rack base. Easily positioned. Supplied as a pair.

Jerry Can Holder - FRUN2009

Black powder coated steel lockable double jerry can holder. Easily opened and closed with a lockable over centre catch. The holder is located in the slots in the roof rack base and requires no drilling. Supplied with fitting kit and instructions.

Spare Wheel Clamp - FRUN29

Black powder coated and lockable spare wheel clamp. The base plate is located in the slots in the roof rack base and requires no drilling. Supplied with fitting kit and instructions.

Spotlight Mount Kit - FRUN54

Black powder coated steel spot light mounting brackets. Supplied as a pair with fitting kit and instructions. Suitable for all Front Runner roof racks.

Spade Mounting Kit - FRUNWC01

Black powder coated steel spade mounting kit. Suitable for Slimline roof racks. (Use FRUN01A to mount FRUNWC01 to and Expedition rack)

Hi-Lift Jack Mounting Kit - FRUNWC05

Black powder coated mounting kit designed to securely mount a Hi-Lift jack to a Front Runner roof rack.

FRUNWC05 suits Slimline roof racks.
FRUN05 suits Expedition roof racks.

We will be increasing our range of Front Runner products, if you require anything that you do not see here please do not hesitate to contact Allmakes Ltd.

3.8 tonne single line pull	Heavy-duty 4.2hp series wound motor
Worm drive gearbox	Automatic load holding brake
Free spool clutch for fast wire payout	Sealed contactor switching
Durable handheld remote control	Hook handling strap
Fully pre-wired ready to connect	150ft High tensile wire rope
	Circuit breaker protected
	Super-duty roller fairlead

WARN

Warn Electric Winches

Warn is probably one of the world's most recognised brands in off road products. Warn have been producing winches for over 45 years and are synonymous with off roading. Their winches are produced with quality and performance in mind and several have unique features such as a built-in high performance compressor.

Warn PowerPlant HD & HP - HD71801 & HP71800

A powerful air compressor combined with a heavy-duty 12,000lb HD or a high-performance 9,500 HP premium winch. This ultimate utility or expedition vehicle winch/compressor combination runs air-tools and gives rapid tyre inflation in one unit. The HD has 80ft of 3/8" cable and the HP has 125ft of 5/16" cable. The compressor produces 12cfm at 0psi and an impressive 5cfm at 90psi.

Warn 9.5XP - 68500

The fast powerful Warn 9.5xp is designed for the serious off-roader who demands a winch that will perform under the most extreme conditions in the world. A powerful 4.6hp motor generates 9,500lbs of pulling power with the longest duty cycle and fastest line speed of any WARN winch when under load. 7.6ft per minute under 9500lbs load.

Warn 9.5ti - 67550

9,500lbs of pulling capacity from probably the most stylish winch on the market. This winch not only looks great, but shrugs off the elements like no other winch on the market, with seals at the key points which give extreme-duty water resistance.

Warn 8274-50 - 38631

Still has the fastest no-load line speed (73.4 feet per minute) and the longest rope (150ft) in the WARN range. The M8274-50 is the preferred winch for off-road challenge events. Its unique gearbox and upright design has proven to be strong & reliable, and its braking system delivers smooth operation with excellent heat dissipation. With a pulling capacity of 8500lbs the 8274 is the off road competitor's choice.

Warn XD9000i - 27550

There are more XD9000i winches fitted on off-road vehicles than any other winch. 9000lbs capacity, 125ft of wire, a no load line speed of 34ft per minute and 3-stage planetary gearing, and the ability to run cool with low amp draw for long winching cycles are just a few reasons why.

Warn XD9000 - 28500

A long-time best seller, the XD9000s compact size and separate control pack let it work effectively in very tight spaces. It uses the 4.6hp Series Wound motor producing 9000lbs of pulling power through 100ft of wire, torque and line speed are outstanding.

Warn XDC - 74700

A low profile and compact shape to fit a wide variety of bumpers and mountings in particular discrete mounts on modern 4x4s. It has a 9,500lb line rating with 100ft of wire and an extreme duty cycle for long, efficient pulls. Other features include a 4.6hp Gen II motor, thermometric protection and a hand held remote control with a built-in torch.

Air Compressor - 73945

Universal Air Compressor suitable for all Warn Winches.

Winch Remote Control - 76080

Suitable for all Warn Winches.

Hi-Lift®

The versatile Hi-lift Jack and related accessories are designed for situations requiring lifting, pushing, pulling, winching and clamping in the toughest environments.

4xRAC Mounting Kit - GHL2

LR200 Mounting Kit - GHL3

XT485 4ft Extreme Jack - GHL4XT

HL485 4ft Hilift Jack - GHL4

HKR Handle Keeper Red - GHL6

JP350 Jack Protector - GHL4/5BAG

Few break free from the pressures of conformity to the accepted rules. To do so convention must be challenged and existence redefined. Once boundaries are rejected it is possible to believe that the world can be changed. Kahn Design was created to challenge convention and redefine ideals.

Our studio tailors luxury bespoke vehicles for individuals who cannot submit to a life of monotonous uniformity and will only accept perfection. This was achieved by A. Kahn in creating the masterpiece that is Kahn Design Ltd. A. Kahn had a passion for cars and used his eighteen years experience in the automotive industry to create the Kahn Brand. Every product is designed to make a statement in itself, while perfectly integrating with the vehicles existing aesthetics.

LHP33	Land Rover Discovery Series I North America, 1994 to 1998

For over 30 years the Allmakes Group has been specialising in the supply of high quality parts and accessories, suitable for all Land Rover vehicles.

Our Customers

We supply Land Rover spare parts to independent wholesalers, fleet owners and workshops in 54 countries on 6 continents, directly from our headquarters in Oxfordshire where we house £5 Million of stock, providing 118,000 part options. In addition we are approved Land Rover parts suppliers to the British Armed Forces as well as other government organisations and NGOs worldwide.

Allmakes do not sell directly to private individuals. However details of our partners can be found on our website www.lrparts.co.uk

Product

Allmakes offers three categories of products.

- **Genuine Land Rover parts**

Allmakes is an authorised parts distributor for Land Rover Ltd and, as such, has access to all the facilities that any other dealer anywhere in Europe will have. This means that Allmakes can provide its customers with a full range of genuine Land Rover parts at competitive prices.

- **Original Equipment parts**

In order to offer our partners a high quality alternative to genuine parts, Allmakes has forged relationships with companies that supply Land Rover factories throughout the world. We ensure that OEM parts are offered at attractive prices. Where possible these are supplied in OEM image but if this is not available, such parts are classified as Allmakes OE.

- **Premium quality replacement parts**

For fast moving parts, or for those that fit older vehicles, Allmakes understands the needs of its partners to have competitive offerings. To meet this demand Allmakes secures about 66% of its replacement parts from European suppliers, many of which supply to our unique specifications. Allmakes prides itself on offering the highest quality of replacement parts in our industry.

Quality

Allmakes is the only UK supplier to hold Lloyd's ISO9001:2000 accreditation for "Storage, supply and delivery of genuine, original and replacement spare parts and accessories for vehicles manufactured by Land Rover". This has enabled us to continually improve our internal processes and also to deliver market leading standards of customer service, along with the highest quality range of parts.

Peace of mind

Allmakes carries out extensive quality testing as part of the process for bringing new products into the range. Our quality commitment is further demonstrated by our 12 month guarantee on all products we supply.

Our clients have come to rely on our professional integrity and our ability to deliver parts that fit first time and ensure the safety of any Land Rover vehicle.

Environmental Aims

Most of our parts are sourced from within Europe, thereby helping us to reduce our carbon footprint, as part of our "green" commitment. In addition we actively implement recycling and repackaging within our processes.

Partnership

Allmakes has played an active role in the start-up, development and growth of many of our customers. Some of these now have annual sales of £2 - £3 million.

In addition we continue to invest in the marketplace through software, the internet, management and diagnostic technologies and most recently an online real-time ordering system that is available to account customers.

It is a core belief of the Company that in order for us to succeed we must understand and satisfy the real need of our customers. This means that we constantly listen to the opinions of our customers so as to match our customer service, product offering and marketing material to their needs.

Allmakes believes that it is important that its partners receive personalised support to maximise their profitability in their local marketplace and this is done via an experienced sales team.
