Light Vehicle Axle General Information

See back cover for
changes from original.

Now also including: The Ultimate Dana 60, Chromoly Axle Shafts, Performance Diff Cover Gaskets, Spools, All-Makes Ring and Pinions, All-Makes Axle Shafts, and more.

Product pictured is intended to be a representation of product category.

SAFETY INFORMATION

WARNING - Failure to follow these instructions could affect vehicle performance and/or safety and result in personal injury or death.

- Do not convert or alter Spicer axles except in accordance with vehicle manufacturer's instructions.

Spicer axles are designed to meet OEM vehicle manufacturer's design and performance specifications. Improper conversion or alteration of these axles can damage the axles and/or other vehicle systems. Contact the OEM manufacturer for specific directions and guidelines.

- Do not change axle gear ratios on vehicles with anti-lock braking systems except in accordance with the vehicle manufacturer's instructions.

Vehicles with anti-lock braking systems may utilize sensors and tone rings within the axle housings to ensure the functioning of the anti-lock brakes. Improperly changing the axle ratios may defeat the anti-lock braking system. If changing axle ratios will require changing the location of the tone ring on the ring gear flange relative to the location of the sensor in the axle housing, contact the OEM manufacturer for specific directions and guidelines.

- Do not reuse or substitute ring gear bolts.

If you reuse a ring gear bolt or substitute an inferior quality bolt, the bolt may loosen or back out of its threaded hole, causing severe damage to the axle gears and other components and possibly resulting in a sudden "locking up" of the axle and loss of control of the vehicle. Always use new bolts specifically recommended for the application and install bolts using proper tools and torquing to the proper specifications.

CAUTION - Do not substitute parts not of Spicer quality.

Spicer axles are designed for each model vehicle, and manufactured and tested for safety and best performance. Replacement parts from other manufacturers may not be made to Spicer's rigid quality standards. To be sure you're getting Spicer quality, always use genuine Spicer parts.

This symbol warns of possible personal injury.

This catalog contains several tables and listings that will help you when you need to identify an axle bill of material number, change a gear ratio or determine the dimensions and part numbers of an axle shaft assembly.

• **Bill of Material Listing**

All Spicer axle bills of material are listed in numerical order giving the manufacturer, model and application for each one. Refer to the appropriate parts catalog listed for your bills of material number.

The parts catalog contains exploded views, parts listings, bill of material tables, and variable parts tables for each series. Listed below are the catalog numbers for each manufacturer's parts catalog:

Ford	X510-2
GMC / Chevrolet	X510-3
Chrysler / Dodge	X510-5
Jeep / Eagle 1999-Current	X510-6
Miscellaneous models 1979-1984	X510-7
All manufacturers prior to 1978	X510-8
All manufacturers 1985-1998 1/2	X510-9
Nissan	X510-10

• **Ring and Pinion Kits**

This table lists all ratios that are available for each model axle. Also included for each ring gear and pinion kit is the tooth count, the pinion number, the gear number and the gear set and pinion nut number. Refer to the General Information section for instructions on how to change gear ratios.

• **Ring and Pinion Sets**

- Numerical listing by ring gear number
- Numerical listing by pinion number

If you do not know the ring and pinion kit number, but can determine either the ring gear number or the pinion number, these listings will help you determine the correct kit number.

• **Differential Case Assembly Kits**

This table lists all the case assembly kits available for each model axle along with the component parts and the ratios each kit can be used with.

• **Axle Shaft Dimensions and Components**

The front axle shaft listing is presented in numerical order by complete assembly number and contains the component parts and dimensions for both outer and inner shaft ends and overall length.

Rear axle shafts are presented in two ways. One chart lists the axles in order by length, showing part numbers and pertinent dimensional information. A second chart lists the axles in numerical order by part number, and also shows the pertinent dimensional information.

General Information

How To Identify A Spicer Axle

All Spicer Carrier Type axles are identified with a manufacturing date (1) and Bill of Material number (2) stamped on the right or left hand tube on driving axles. The Bill of Material number may also be found on the carrier in some models as shown in illustration (2A). For independent front suspension (IFS) axles, the B/M number may be located at one of three locations: 1) A vertically positioned tag near the center of the right hand side support arm, 2) stamped into the left hand side support arm (opposite end of the camber adjuster), or 3) stamped into the "nose end" of the axle carrier. The location of the information will depend on the manufacturing date of the axle.

The axle model number will be cast into one of the webs as shown (3), or it can be on the nose.

Each axle contains a gear ratio tag (4), and if the axle is equipped with a limited slip differential, it will have a tag specifying the type of limited slip lubricant to be used (5).

Refer to the appropriate model number section for parts identification and a breakdown of the Bill of Material.

How To Change Gear Ratios

To increase or decrease a gear ratio, there are certain steps that must be taken. The differential case depends upon the ratio desired. For each axle model, there is a high-ratio and a low-ratio case as illustrated below:

Dana Axle Model Case	Low Ratio Case	High Ratio Case	Dana Axle Model Case	Low Ratio Case	High Ratio
Dana 27™	3.73 and Down	3.92 and Up	Super 44™/226	None	3.07 and Up
Dana 28™/174	3.45 and Down	3.73 and Up	Dana 50™/229	4.30 and Down	—
Dana 28™/174 IFS Aerostar	3.27, 3.73	—	Dana 60™/248	4.10 and Down	4.56 and Up
Dana 30™/181	3.55 and Down	3.73 and Up	Super 60™/256	4.30 and Down	4.56 and Up
Super 30™/186	3.55 and Down	3.73 and Up	Dana 61™ Semi Float	3.00 and 3.07 only	—
Dana 35™/194	2.35 only	—	Dana 61™ Full Float	3.31 and Down	3.54 and Up
Dana 35™/194	3.31 - 3.73	3.54 and Up	Dana 70™/267	4.10 and Down	4.56 and Up
Super 35™/198	2.73 - 3.31	3.54 and Up	Dana 70™ 3HD	3.42 and Down	3.73 and Up
Dana 36™/200 ICA	2.73 and Down	3.07 and Up	Dana 70™ 2UA	3.07 only	—
Dana 44™/216	3.73 and Down	3.92 and Up	Super 70™/273	None	4.10 and Up
Dana 44™/216 ICA 1984 & earlier	3.73 and Down	3.92 and Up	Dana 80™/286	3.73 and Down	4.10 and Up
Dana 44™/216 ICA 1985 & later	2.87 and Down	3.07 and Up			

Example - If you have a Dana 44™ rear axle with a 3.54 ratio and wish to change to a 3.73 ratio, you change only the ring gear and pinion assembly. If you change the ratio to a 4.09, you must change to a high-ratio case in addition to changing the ring gear and pinion. The application section will show you what case to use. When the vehicle is equipped with both front and rear driving axles, the gear ratios must be the same in both axles. **The drive gear screws are self-locking and must be replaced with new screws each time that they are removed.**

How Limited Slip Differentials Operate

A conventional differential transmits all the ring gear torque through the differential gears to the axle shafts. Torque is at all times equal on the axle shafts, and if one wheel slips, the other wheel can only put out as much torque as the slipping wheel.

The Spicer Limited Slip differential has the same power flow as a conventional differential, plus a more direct flow which automatically takes effect as driving conditions demand. This more direct power flow is from the differential case to each axle shaft through a clutch plate and disc arrangement.

Arrangement of these plates and discs is at the option of the vehicle manufacturer, so care should be taken during disassembly to note the arrangement of these components.

The Limited Slip construction permits differential action when required for turning corners and transmits equal torque to both wheels when driving straight ahead. However, when one wheel tries to spin due to leaving the ground, a patch of ice, etc., the clutch packs automatically provide more torque to the wheel which is not trying to spin.

The Limited Slip differential resists wheel spin on bumpy roads and provides more pulling power when one wheel tries to slip. In many cases of differences in traction, pulling power will be automatically provided until both wheels start to slip.

In diagnosis of vehicle operators' complaints, it is important to recognize two things.

1. If, with unequal traction, both wheels slip, the Limited Slip Differential has done all it can possibly do.
2. In extreme cases of differences in traction, the wheel with the least traction may spin after the Limited Slip has transferred as much torque as possible to the non-slipping wheel.

How To Distinguish a Powr-Lok™ from a Trac-Lok™

All Models **except Dana 80™ /286**: The Powr-Lok design is identified by its 2-piece case. The Trac-Lok design is identified by its 1-piece case.

Dana 80™ /286 only: Both the Powr-Lok and the Trac-Lok use 2-piece cases in the Dana 80™ /286 axle. The difference between the two is in the shape of the holes for the cross shaft. The Powr-Lok case will have cross shaft holes that are "U" shaped in one case half and "V" shaped in the other case half. The Trac-Lok case will have cross shaft holes that are semicircles in both case halves.

It is also possible to replace an existing Powr-Lok unit with a complete Trac-Lok unit. For this purpose, the differential case assembly must be replaced.

POWR-LOK™
 2-Piece Case
 4-Pinion Mate Gears

TRAC-LOK™

PERFORMANCE

STRENGTH. POWER. ENDURANCE.

UNLEASHED.

Wherever limits are pushed, Dana is there. That's why we've introduced the new Ultimate Dana 60™ front and rear axles for the Jeep® Wrangler® JK. Not only is it the biggest, strongest Dana 60™ axle we've ever built, but it also incorporates many of the upgrades that off-roaders demand. You get a direct-fit, bolt-in solution for your Jeep Wrangler JK, plus the unparalleled technology, strength, and durability that comes from having Spicer Inside.™

ULTIMATE DANA 60™ REAR AXLES for the JEEP JK

Full-Float Design. Full-On Strength. When you're taking on the roughest terrain, you need the biggest, strongest axles available. You need the Ultimate Dana 60™ axle. Engineered to be a direct-fit, bolt-in solution for the Jeep Wrangler JK, the Ultimate Dana 60™ axles can withstand the extreme punishment of extreme off-roading. Built for superior strength inside and out, these axles have what it takes to overcome even the toughest obstacles.

Features and benefits include:

- Full-float design
 - Vehicle weight carried by housing instead of shaft
 - Delivers greater load-carrying ability
- 35 spline SAE-4340 nickel chromoly steel axle shafts
- Select electronic locking differentials
- Upgraded heavy-duty brakes with plug-and-play ABS system
 - Massive vented rotors (358mm O.D.) and dual piston calipers for optimal braking power and optimal cooling
 - Ideal on- and off-road stopping power for vehicles with large tires
- Genuine Made in the USA Spicer 9¾" (248 mm) ring and pinion gear inside
- 1350 series half-round end yoke
- Axle tubes: 3½" outside diameter/.390" wall thickness
- Heavy-duty 8 x 6.5" wheel bolt pattern
- Heavy-duty brackets
- Nodular iron diff cover

Part Number	Part Description	Application Summary	Ratio
2023612-1	Dana 60 Axle Assy.	2015-07 Jeep Wrangler JK - Rear	4.88
100054942	Dana 60 Axle Assy.	2015-07 Jeep Wrangler JK - Rear	5.38

ULTIMATE DANA 60™ FRONT AXLES for the JEEP JK

Added Features for Added Confidence. For years, hardcore off-roaders have been modifying their Dana 60™ axles for even better performance over the rocks, across the sand, and through the mud. Here at Dana, we're paying attention. We have incorporated a number of new features into the Ultimate Dana 60™ axle, including chromoly axle shafts, a greatly enhanced carrier with upgraded gearing, and more. In addition, we added massive new Spicer® SPL®-70 universal joints for premium performance you cannot get anywhere else.

Features and benefits include:

- Massive Spicer® SPL®-70 u-joints—exclusive to Dana
 - Providing optimal performance for lifted vehicles with larger tires
 - Improved “rock solid” seals for optimal protection from environmental contamination
 - Manufactured from cold-forged steel
 - Providing for higher torque load
 - Spicer® 35 spline SAE-4340 nickel chromoly steel axle shafts
 - Designed for larger tires and off-road punishment
 - Ensuring maximum strength and durability
 - Warn® 35 spline hub locks
 - Dead spindle design
 - Ensuring additional strength
 - Allowing for wheel bearings to be serviced individually
 - Easier to repair and service than unit bearing design
 - High-strength, heavy gauge brackets
 - Additional durability where it matters the most
 - Skid plate incorporated into lower control arm bracket
 - High-clearance carrier with ribbed housing design
 - Cover face rotated back for greater ground clearance
 - Reinforced ribbing on bottom of carrier to prevent hang-ups on rocks or rough terrain
 - Select electronic locking differentials
 - Precision-forged gears offer ideal meshing, strength and durability
 - Heavy-duty 8 x 6.5" wheel bolt pattern
- Nodular iron diff cover with protective ribbing
 - Raised fill plug for increased fluid capacity due to increased pinion angles
 - Upper and lower control arms in same location as OE
 - Better fit, less adjustment on control arm
 - Optimal articulation
 - Easy to install
 - Cast-in upper control mount for added strength and durability
 - Genuine Made in the USA Spicer® 10" (256 mm) ring and pinion gear
 - Available ratios include 4.88 and 5.38
 - Precision heat treat for optimal hardness and durability
 - Face hobbled for precise mating of gear teeth and a quieter ride
 - Shot peened for double the fatigue life
 - Lapped to reduce noise and heat
 - Spicer® 1350 Strap-style/Half-round end yoke
 - Provides added strength
 - Axle tubes: 3½" tube diameter/.370" wall thickness
 - Offers superior strength
 - Helps prevent steering from being knocked out of alignment
 - Upgraded heavy-duty brakes with plug-and-play ABS system
 - Massive vented rotors (360mm O.D.) and dual piston calipers for optimal braking power and optimal cooling
 - Ideal on- and off-road stopping power for vehicles with large tires

Note: If required, RTV gasket material is part number 38615.

(7) 706807X and 706808X kits contain differential cross shaft lockscrew patial cross shaft lockscrew part number 39233 which has an allen type socket head. 706834X & 706835X kits contain differential cross shaft lockscrew part number 4013101 which has a 12 point head. Whenever one of these lockscrews is removed, it is to be discarded and replaced with a new one. The two types of lockscrews are not interchangeable.

(8) Includes silicone gasket material and standard gasket.

(9) For diesel applications.

(10) Used on Dana 70™ B & 70™ HD with .625" offset of pinion (without differential bearing spacer). If spacers are required, use part number 34848-28 (width=.120") or 34848-10 (width=.150" I.D.=3.500", O.D.=4.125"), or use 42563 (width=.120", O.D.=3.804", I.D.=3.065").

(11) Double lapped for quieter operation.

(12) Used in Dana 70™ HD (with 34848 Differential Bearing Spacer, included in 706061X kit).

(13) Special for industrial off highway axles only. Use of these gears can be extremely noisy in other applications.

(14) With .500" offset of pinion.

706048-1X ⁽¹⁰⁾	3.73 (41 - 11)	26008-1X	34836	34837	706999-2X

Note: If required, RTV gasket material is part number 38615.

(10) Used on Dana 70™ B & 70 HD with .625" offset of pinion (without Differential Bearing Spacer). If spacers are required, use part number 34848-28 (width=.120") or 34848-10 (width=.150", I.D.=3.500", O.D.=4.125"), or use 42563 (width=.120", O.D.=3.804", I.D.=3.065").

(16) Used in Dana 70™ 3HD for GM. Not interchangeable with any other standard rotation kits.

(17) Used in Dana 70™ 2U with .625" offset of pinion.

⁽¹⁸⁾ If spacer is required, order one 500595-17 roll pin and two 30482 spacers.

⁽¹⁹⁾ In this kit the side gear is machined for "C" clip clearance.

⁽¹⁹⁾ In this kit the side gear is machined for "C" clip clearance.

⁽²⁰⁾ Jeep Disconnect

⁽²¹⁾ Differential case has unequal inside journal diameters. (1.337" on disconnect side vs. 1.318" on non-disconnect side)

⁽²²⁾ Anti-lock provision.

⁽²³⁾ Uses 3/8" Ring Bolts

⁽²⁴⁾ Uses 7/16" Ring Bolts

⁽²⁵⁾ Heavy Duty Case

SPICER®

A F T E R M A R K E T

PERFORMANCE

STRENGTH. POWER. ENDURANCE.

UNLEASHED.

SPICER® PERFORMANCE SPOOLS

Specialty Solutions that Push the Boundaries. Spicer performance spools give you the ultimate in traction and a distinct advantage off-road or on the track. Spicer spools keep the left and right axles spinning together, so you get constant traction and peak performance that lasts.

SPICER®

PERFORMANCE SPOOLS

Spicer Parts. Built Tough for the Performance Market.

Wherever boundaries are being pushed, Spicer parts are there. That is why Spicer parts can deliver innovations that meet the latest performance demands. That commitment to the specialty market is what has made the Spicer brand the most trusted name in the business.

Spicer performance spools offer tremendous advantages for racing enthusiasts and hardcore off-roaders, providing features and benefits that standard differentials cannot offer. Spicer performance spools replace the need for a differential case, thus eliminating failures from high-torque, high-impact situations.

Forged from chromoly 4130 steel

- Provides optimal strength

Heat treated and metallurgically tested

- Ensures ideal hardness for performance applications

Available in lightweight versions

- Delivers lighter rotating mass

Available for all makes

21 SKUs available

Spicer spools are not recommended for everyday street driving, but they offer incredible benefits in performance applications. Ask your Spicer parts representative about whether spools are right for your vehicle, and visit www.DanaUnleashed.com to see our full line of specialty parts for off-road and racing vehicles!

Talk to your Dana Aftermarket Performance representative today—or visit www.DanaUnleashed.com.

PERFORMANCE

STRENGTH. POWER. ENDURANCE.

UNLEASHED.

SPICER® THIRD MEMBER for FORD 9"

Center section solutions for high-performance applications. Looking for peak performance for your off-road, street rod, circle track, or other racing vehicle? There is a bolt-in Spicer® third member that is designed to meet the needs of your Ford 9" application. A premium-grade aluminum option is lightweight and built for speed, while a nodular iron option ensures excellent handling even in brutal off-road conditions. And both options are backed by Dana, the global leader in driveline components.

SPICER®

THIRD MEMBER for FORD 9" APPLICATIONS

Two Options. One Brand. Maximum Performance.

Wherever limits are tested, Dana is there with products engineered to meet the needs of off-roaders, racers, and more. We offer Spicer® parts designed to deliver the strength, power, and endurance that give performance vehicle drivers a competitive edge. The Spicer third member is one more example, with two quick-exchange options for your specific requirements.

Choose from: Aluminum construction

- Built from premium-grade aluminum
- Lightweight for circle track, street rod, and other racing applications

Nodular iron construction

- Heavy duty design

Both offer: Fill plug

- Built-in solution for easy maintenance

Billet adjuster nut

- Provides increased durability and strength

High-performance reusable gaskets

- Anti-stick coating on outside
- Woven steel core at the center
- Teflon coated for clean release

Spicer Part Number	Application	Description	Carrier Bearing Bore	Material	Spline
10007694	Ford 9"	Drop Out Housing/Third Member Case	3.250"	Aluminum	35/40
10007698	Ford 9"	Drop Out Housing/Third Member Case	3.250"	Nodular Iron	35/40
10007696	Ford 9"	Drop Out Housing/Third Member Case	3.062"	Aluminum	28/31
10007700	Ford 9"	Drop Out Housing/Third Member Case	3.062"	Nodular Iron	28/31

SPICER® DIFF COVER PERFORMANCE GASKETS

Easy to Install. Built to Last.

Spicer differential cover gaskets are built to withstand the rigors of performance applications. They instantly seal into place, even over minor surface irregularities. And Spicer performance diff cover gaskets are manufactured to meet Dana's quality standards, making Spicer the most trusted name in drivetrain products. Talk to your Spicer parts representative today, and keep your differential performing to the standards you have come to rely on.

DIFFERENTIAL COVER PERFORMANCE GASKETS

Quick Solutions. Spicer Quality.

Did you know that Dana offers a wide range of parts, branded with the legendary Spicer name and designed to make repairs quick and easy? The Spicer performance differential cover gasket is a great example. Built to the exact specifications of our performance diff covers, these gaskets ensure that you are getting a perfect fit and keeping your differential sealed effectively.

Spicer performance differential cover gaskets offer all-makes coverage for street, strip, drag, and off-road applications. Get the most out of your vehicle with gaskets that are:

Manufactured with proprietary high-density performance material

- Provides no re-torque design with maximum compression and sealing
- Maintains the initial load without the need for elastomer beads, which can rupture and require re-torque

Built to withstand extreme temperatures

- Engineered specifically for performance settings

Designed to seal minor surface irregularities

Reusable*

- Coated with Teflon®
- Offers cleaner release during replacement

Built with a mechanically and chemically bonded woven steel core

- Delivers stiffness for easy in-field repairs and radial strength

Made to adhere without messy RTV sealant

- Saves on install time by eliminating the time needed for RTV to cure

Made in USA

PERFORMANCE

STRENGTH. POWER. ENDURANCE.

UNLEASHED.

Engineered for optimum strength off-road. These genuine Spicer high-performance axle shafts are optimized for use with larger tires, and they are manufactured using only SAE-4340 nickel chromoly steel. Get optimal strength and durability, plus the Dana- backed innovation that is built into every Spicer axle shaft. Learn more about the benefits of SAE-4340 nickel chromoly steel axle shafts, and talk to your Spicer parts representative today.

SPICER® NICKEL CHROMOLY STEEL AXLE SHAFTS

Not all chromoly shafts are alike. At Dana, we've engineered the SAE-4340 nickel chromoly axle shaft to exceed OE standards and meet the exacting demands of off-road. Hit the trail with the confidence that comes from knowing you are backed by the global leaders in driveline products. Engineered to deliver added strength and durability, these genuine Spicer axle shafts are one more example of the innovations that we bring to performance applications.

See the features and benefits of our high-performance axle shafts, including:

SAE-4340 nickel chromoly steel construction

- For ideal hardness throughout the part
 - Nickel provides additional toughness
 - Chromium ensures high-temperature strength and resistance to abrasion
 - Molybdenum helps maintain a specified hardenability

Optimized for high-performance strength and durability

- Designed to withstand off-road punishment

Heat treatment processes

- Delivering the same surface hardness and case hardness, while achieving a higher core hardness for greater strength
- Ensuring optimal hardness inside and out
