

The original AX-3557 Construction Note (8 pages) are labeled as AX-3557 followed by the page number.

“Mod x-x” are the seven pages of modifications to the construction of the calibration fixture and include two pages from the construction note with my pencilled-in notes.

This unit was constructed in 1978, so don't expect me to provide you with a lot of detailed information past what you read here. You now know what I know!
