

Willtek 4032 STABILOCK® Factory-Certified

The communication test system of choice for testing analogue and multi-standard wireless systems

- Radio and audio measurements
- AUTORUN
- Options available for GSM, TETRA, MPT 1327 and many more
- Reliability

boosting wireless efficiency

Testing different types of mobile phones has never been so fast and easy. The STABILOCK 4032 is probably the only communication test set that enables you to assess analogue and digital mobiles at the push of a button – without having to reconfigure the hardware.

- Universal test platform for analogue and digital mobiles
- Supports Private Mobile Radio (PMR) standards such as TETRA and MPT 1327
- Fast, powerful spectrum analyzer option
- Test functionality for analogue and digital trunked radios
- Comprehensive base station tests

In excess of 5000 STABILOCK 4032 radio test sets are currently in use worldwide. This success has been due to the versatile design, simple operation and wide variety of system tests which can be made with the "universal" test set.

Applications range from high-speed production tests and quality measurements to servicing and commissioning tests. The wide variety of hardware modules and software options covering frequency ranges up to 2.3 GHz, provide comprehensive capability of analog and digital cellular, cordless and two-way radio systems.

Additional capability includes base station measurements and paging tests. Systems include TETRA Digital Trunked Radio, GSM as well as CDMA base station testing at 800 MHz and 1900 MHz.

A factory-certified offer

The Willtek 4032 STABILOCK Factory-Certified is a completely refurbished instrument based on the successful communications test system 4032. It offers the same functions and features as a factory-new 4032 STABILOCK. In fact, it is going through a factory service inspection and maintenance, resulting in an instrument that is as good as new. The unit is calibrated, to include alignment and verification, and meets data sheet specification. Extensive tests are carried out to ensure Willtek factory quality standard. To prove that Willtek is committed to and convinced of the high quality of the 4032 STABILOCK Factory-Certified, Willtek grants a one-year factory warranty for this product.
