Willtek 4405 Turbo Option

Breaking the Speed Barrier with Industry-leading Testing Technology

- Reduces test time in phone production by up to 50%
- Delivers transmitter measurements at twice the speed
- Increases production capacity throughput by over 25%
- Provides a potential revenue increase of 25%
- Integrates easily and seamlessly with Mobile Production Test System 4400

Willtek's 4405 Mobile Phone Tester provides fast, high quality mobile-phone testing for manufacturers who want competitive advantage and product excellence. Now you can break the mobile-testing speed barrier with Willtek's Turbo Option. This ground-breaking development integrates easily with the future-proof 4405 platform, ensuring fast installation on the production line.

Test stations need no longer be the bottleneck in your production flow – the Turbo Option typically increases production capacity by 25% and reduces test times by up to 50%. With the new, fast DSP add-on board, test speed can be improved without compromising measurement accuracy.

Features

- Reduces test time in phone production by up to 50%
- Delivers transmitter measurements at twice the speed
- Increases production capacity throughput by over 25%
- Provides a potential revenue increase of 25%
- Integrates easily and seamlessly with Mobile Production Test System 4405

The Turbo Option increases production and service throughput by delivering transmitter measurements faster than ever. A dual band GSM phone can now be tested on six channels, different power levels and includes spectrum measurements in less than 10 seconds.

Ask your local Willtek organization about upgrade possibilities.

Specifications

Willtek 4405	M 101 105
Mobile Phone Tester	
Turbo Option	M 248 359
Upgrade kit for Turbo option	M 248 652
(Required to install Turbo Option in 4400M if S/N <0611000)	

Accessories

Willtek provides a full range of supporting equipment for mobile phone tests including RF Shield Box and mobile phone adapters.
